Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Mon 12/02/2024 TO 18:00HRS Tue 13/02/2024

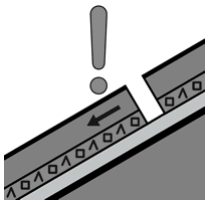

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Tuesday 13/02/2024

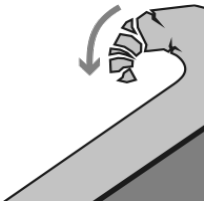

Avalanche Problems

Wind Slab

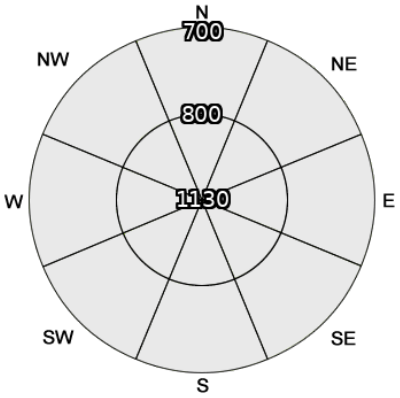

Persistent Weak Layers

Cornices

Forecast Snow Stability & Avalanche Hazard

Weak, unstable windslab will become deeper and more widespread on all steep North to East aspects above 900m. Where avalanches are likely. New weak cornice development also expected over these aspects, especially gully tops and coire rims. Better stability on ridge lines and recently wind scoured locations. The avalanche hazard will be Considerable

Forecast Weather Influences

Strong West-South-West later South-West winds. Snow showers throughout the forecast period. Remaining cold.

Comments

Declining stability: conservative route choice advised.
