

## THE AVALANCHE HAZARD WILL BE CONSIDERABLE

### Avalanche Hazard Forecast for Wednesday 14/02/2024

#### Avalanche Problems

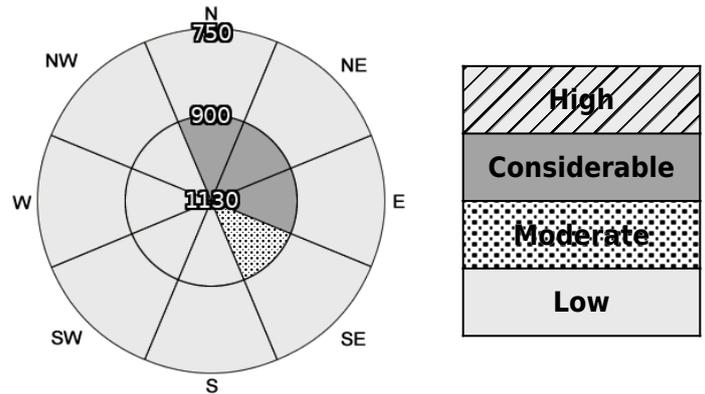

Wind Slab

Cornices

#### Forecast Snow Stability & Avalanche Hazard

Weak windslab will continue to develop overnight on steep North to East aspects above 900 metres. Collapse prone cornices will overhang many of these locations, and will weaken further in milder conditions later. Some early consolidation possible in all snow but particularly below 900 metres. The avalanche hazard will be Considerable.

#### Forecast Weather Influences

Dry overnight and for most of the day. A little rainfall is possible late in the period. Strong South-West winds easing to light South-Easterly and becoming strong by the end of the day.

#### Comments

Weak cornices a developing hazard.
