Avalanche Hazard Forecast

**Issued 24/02/2024**

FOR PERIOD 18:00HRS Sat 24/02/2024 TO 18:00HRS Sun 25/02/2024

## THE AVALANCHE HAZARD WILL BE MODERATE

### Avalanche Hazard Forecast for Sunday 25/02/2024

#### Avalanche Problems

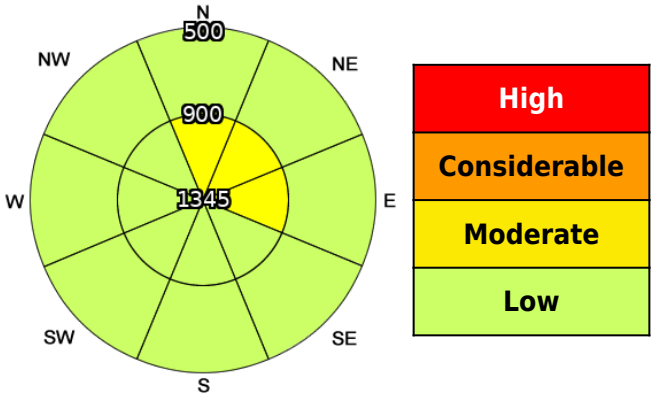

**Wind Slab**

**Cornices**

#### Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. Significant areas of moderately bonded windslab will remain on mainly, but not exclusively, North to East aspects above 900 metres. This will continue to slowly consolidate. Some large and unstable cornices will remain above these aspects, and will be prone to collapse. Below 900 metres, and on other aspects the snowpack is generally shallow and stability will be better. The avalanche hazard will be Moderate.

#### Forecast Weather Influences

It will be another dry settled day with light Easterly winds. The freezing level will be around 700 metres.

#### Comments

Another fine winter's day expected on Sunday.
