

## THE AVALANCHE HAZARD WILL BE MODERATE

### Avalanche Hazard Forecast for Tuesday 05/03/2024

#### Avalanche Problems

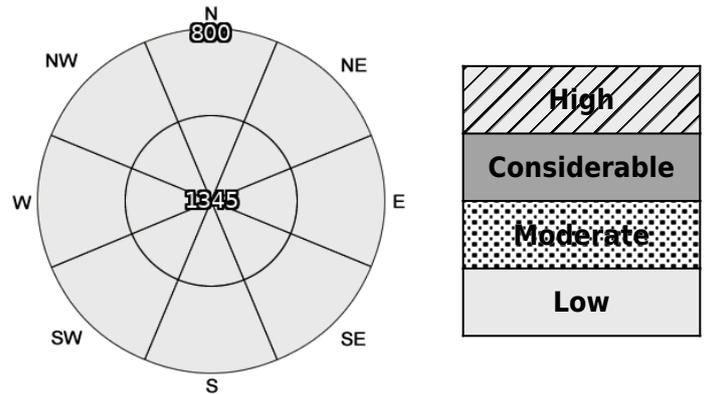

Wind Slab

Cornices

#### Forecast Snow Stability & Avalanche Hazard

Poorly bonded windslab will become more widespread on steep North-West to North-East aspects above 900m. Some very sheltered East facing gullies may also be affected by cross loading. Weak new cornice development expected over steepest lee slopes. Better stability at lower altitudes and on wind exposed aspects. The avalanche hazard will be Moderate.

#### Forecast Weather Influences

A few snow showers overnight. Cold but with a slow rise in freezing level during daylight hours. Strong South-Easterly winds throughout.

#### Comments

Much stronger winds on Tuesday.
