FOR PERIOD 18:00HRS Tue 05/03/2024 TO 18:00HRS Wed 06/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Wednesday 06/03/2024

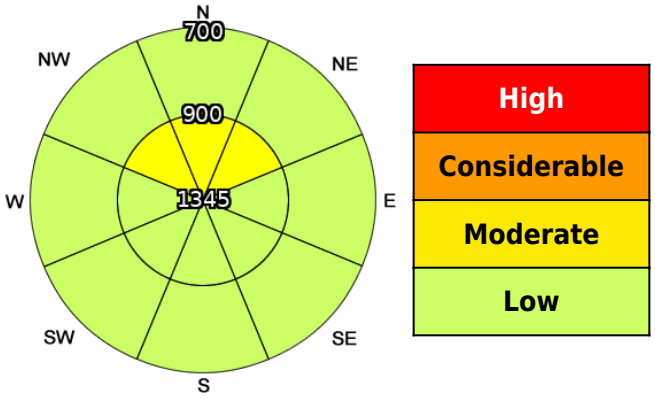

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. It will continue to slowly consolidate in the dry conditions. However, areas of moderately bonded windslab will remain on mainly North-West to North-East aspects above 900 metres. On other aspects the snowpack will tend to be either hard, icy and stable or very shallow. The avalanche hazard will be Moderate.

Forecast Weather Influences

Little change is expected in the weather. It will remain generally dry with gale force South-East winds. The freezing level will be around 1000 metres.

Comments

Turning colder towards the weekend.
