Issued 08/03/2024

FOR PERIOD 18:00HRS Fri 08/03/2024 TO 18:00HRS Sat 09/03/2024

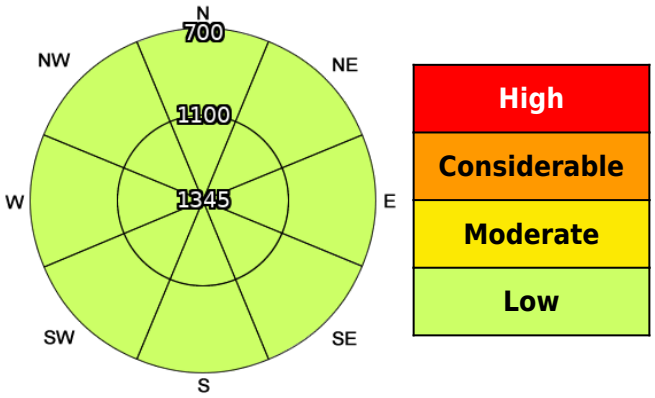

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 09/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will be generally stable in most locations. Some well bonded areas of windslab will persist on North-West to North-East aspects above 1100 metres. A few isolated, shallow and avoidable deposits of fresh windslab will be found in wind sheltered locations. These are not expected to be significant. The avalanche hazard will be Low

Forecast Weather Influences

Very strong to gale force Easterly winds throughout the forecast period. Dry with clear spells. Summit temperatures will be around -6 deg C throughout the period with temperatures remaining below freezing above about 600 metres.

Comments

The snowpack has become firm and icy in many locations presenting a significant hazard from unguarded slips or trips.
