Southern Cairngorms

Avalanche Hazard Forecast

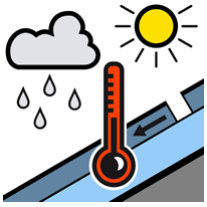
Issued 11/03/2024

FOR PERIOD 18:00HRS Mon 11/03/2024 TO 18:00HRS Tue 12/03/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 12/03/2024

Avalanche Problems

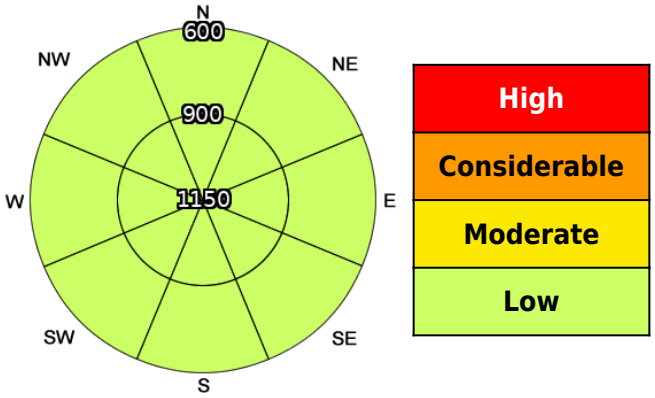


Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Initially the snowpack will be firm but will start to thaw at all levels as the day progresses. The majority of the snowpack will remain generally well bonded throughout with isolated wet snow instabilities possible on steep terrain. West through North to East aspects above 900 metres mainly affected. Stability of remaining cornices will be suspect. The avalanche hazard will be Low.



Forecast Weather Influences

Remaining cold overnight but by dawn the freezing level will start to lift to above the summits by afternoon. Light rainfall throughout the day. Gale force winds, mostly South-Easterly.

Comments

Currently very icy underfoot but Tuesday will be much milder with freezing levels above the summits with rain.
