Southern Cairngorms

Avalanche Hazard Forecast

Issued 13/03/2024

FOR PERIOD 18:00HRS Wed 13/03/2024 TO 18:00HRS Thu 14/03/2024

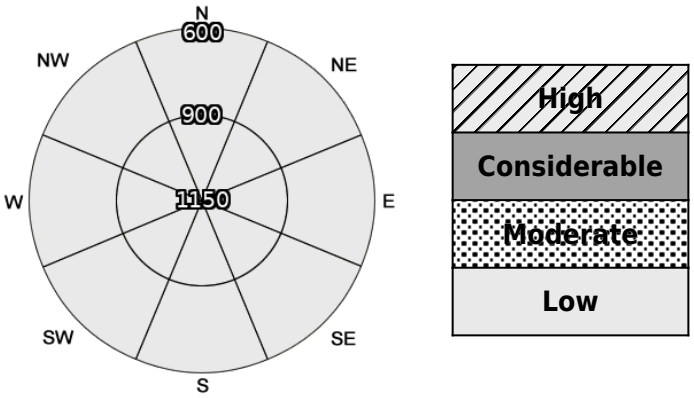

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 14/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Any new snowfall will be light and generally insignificant. Existing snow will be firm and well bonded at all levels. Greatest cover will be found on West through North to East aspects and on higher plateau areas above 900 metres. The avalanche hazard will be Low.

Forecast Weather Influences

Cold overnight with the freezing level rising above most of the summits by afternoon. Precipitation will fall as snow on the highest summits but as sleet or rain elsewhere. Overnight gale force South-Westerly winds will ease and back to the South-East by late afternoon.

Comments

Most gullies on Lochnagar are still complete with older snow expected to be refreeze overnight.
