FOR PERIOD 18:00HRS Wed 27/03/2024 TO 18:00HRS Thu 28/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 28/03/2024

Avalanche Problems

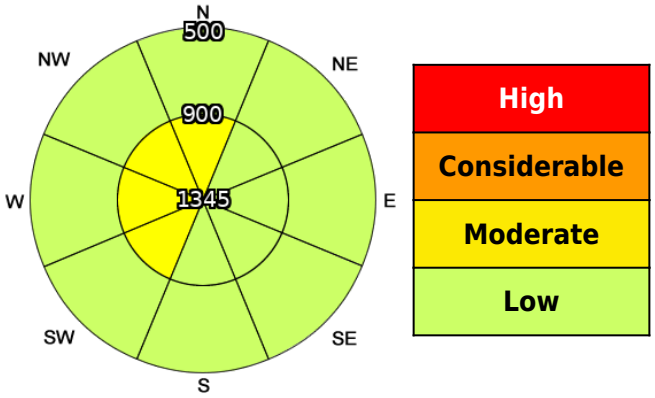

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Unstable windslab will continue to accumulate in wind sheltered locations mainly on South-West through West to North aspects above 900 metres. Fragile cornices will develop above these aspects. Windward aspects will generally be firm and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

Strong South-Easterly winds overnight will back to the East-North-East and become very strong during the day. Snow showers mainly in the evening and early part of the night. The freezing level will drop to around 600 metres overnight, before rising to 1100 metres in the afternoon.

Comments

The outlook is for lighter winds and summit snow showers on Friday and Saturday.
