Southern Cairngorms

Avalanche Hazard Forecast

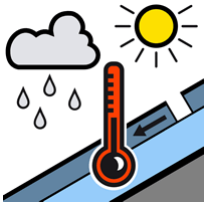

Issued 28/03/2024

FOR PERIOD 18:00HRS Thu 28/03/2024 TO 18:00HRS Fri 29/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 29/03/2024

Avalanche Problems

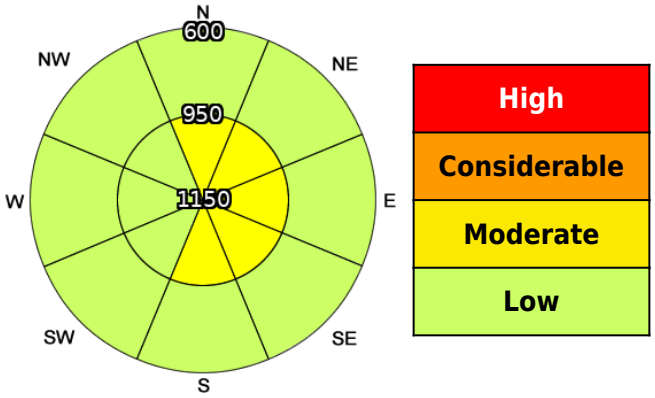

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The majority of the snowpack will thaw with wet surface instabilities possible on any steep ground. Moderately bonded deeper accumulations will persist on steeper, wind sheltered locations on South through West to North-West aspects above 1000 metres. Below this level snow will be soft, moist but generally well bonded. The avalanche hazard will be Moderate.

Forecast Weather Influences

The freezing level will rise to around 1000 metres with light snow above this level in the afternoon. Winds strengthening during the day, moderate in strength from the South-West.

Comments

A wet afternoon but there was an improvement in stability.
