Lochaber

Avalanche Hazard Forecast

Issued 29/03/2024

FOR PERIOD 18:00HRS Fri 29/03/2024 TO 18:00HRS Sat 30/03/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 30/03/2024

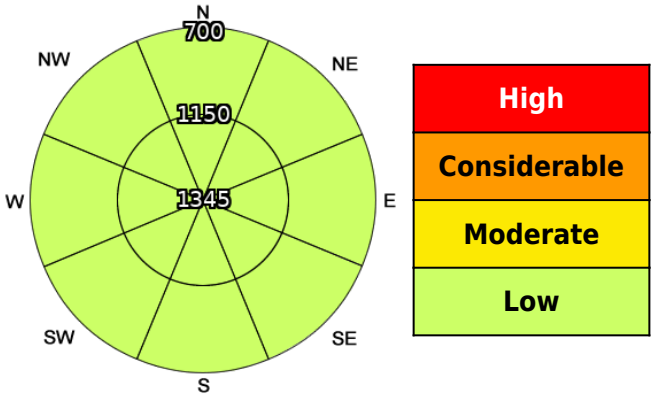

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Isolated pockets of windslab that persist on shaded North and North-East aspects above 1150 metres will continue to consolidate through the forecast period. Elsewhere the existing snowpack will have good stability. Localised deposits of fresh windslab will develop mostly on steep North-West to North-East aspects mostly above 1100 metres. These deposits are expected to be shallow and easily avoidable. The avalanche hazard will be Low.

Forecast Weather Influences

Scattered showers throughout the period will fall as snow above around 1000 metres. Fresh South-South-Easterly winds overnight will veer South-South-Westerly during the day. The freezing level will be around 1000 metres at dawn rising to around 1200 metres by the end of the day.

Comments

After scattered showers on Saturday dry conditions are forecast for Easter Sunday.
