Southern Cairngorms

Avalanche Hazard Forecast

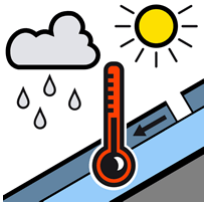
Issued 29/03/2024

FOR PERIOD 18:00HRS Fri 29/03/2024 TO 18:00HRS Sat 30/03/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 30/03/2024

Avalanche Problems

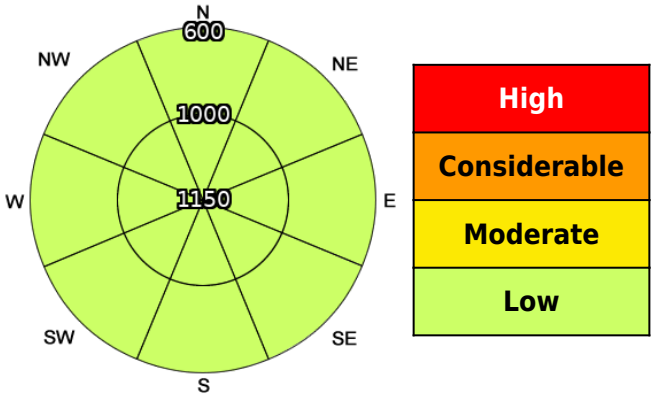


Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Any new snow will be insignificant with the majority of the snowpack continuing to consolidate. The soft snow will remain generally well bonded and demonstrate good stability in most locations. But instabilities will persist within deeper accumulations mainly on South-West to North-West aspects above 1000 metres. Stability of remaining cornices will be poor. The avalanche hazard will be Low.



Forecast Weather Influences

Overnight there will be light snowfall above 1000 metres, otherwise a rain shower in the afternoon. Freezing levels around or above 1000 metres throughout. Winds, moderate in strength, South or South-South-West during the day.

Comments

Debris on various aspects caused by milder period and rain late yesterday.
