

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 31/03/2024

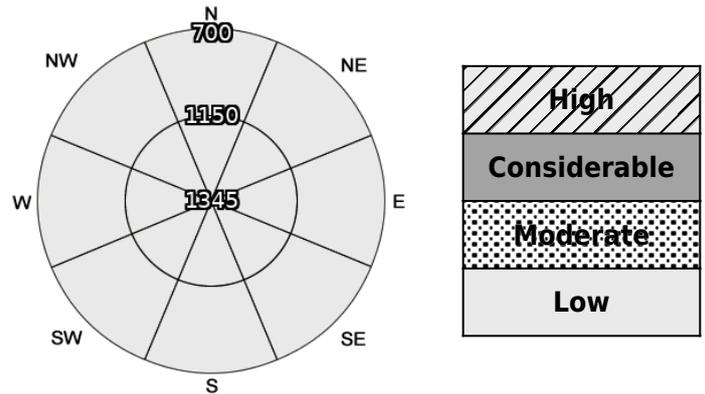

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to gradually consolidate. Snowpack stability will be generally good. Minor wet snow surface instabilities possible on steep slopes exposed to the sun. Cornices becoming increasingly unstable in the milder temperatures particularly where directly in the sun. The avalanche hazard will be Low.

Forecast Weather Influences

A clear dry day with moderate East-South-Easterly winds. The freezing level will rise above the summits.

Comments

A weak ridge of high pressure is forecast to give dry conditions for Sunday, Monday and Tuesday.
