Avalanche Hazard Forecast

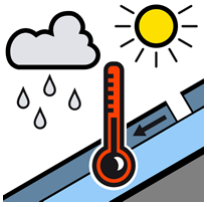

Issued 05/04/2024

FOR PERIOD 18:00HRS Fri 05/04/2024 TO 18:00HRS Sat 06/04/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 06/04/2024

Avalanche Problems

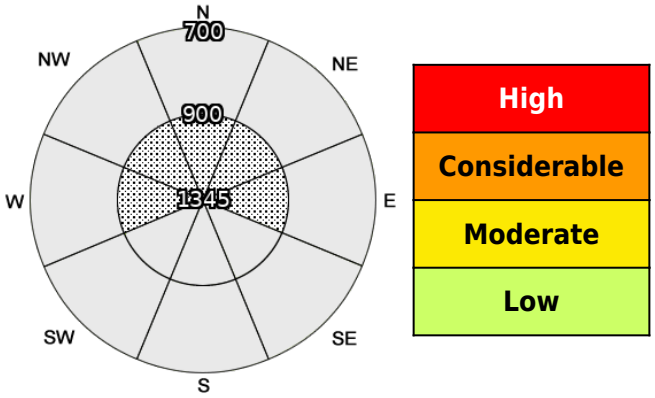

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The wet snowpack will slowly consolidate through the period. However, wet snow instability will remain on steep slopes on West through North to East aspects above 900 metres throughout the day. Remaining cornices will be prone to collapse. Below 900 metres stability will be better. The avalanche hazard will be Moderate.

Forecast Weather Influences

A mild day with the freezing level well above the summits throughout. There will be some rain particularly during the morning. Gale force winds will be from the South.

Comments

Very strong winds expected on Saturday.
