Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 07/04/2024 TO 18:00HRS Mon 08/04/2024

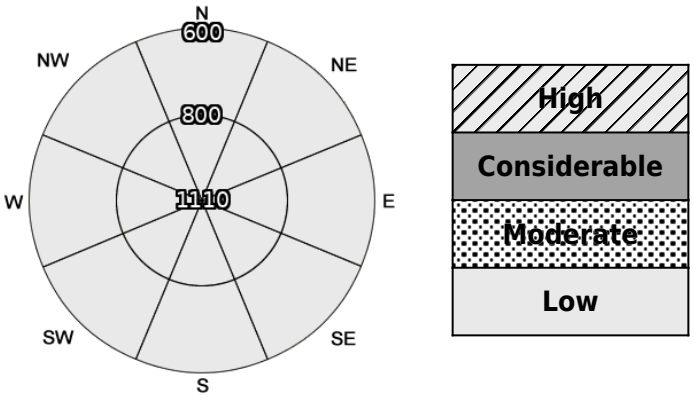

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 08/04/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The limited patchy snow cover will remain well bonded and stable in all locations. Any new summit snow deposits overnight will not be significant. The avalanche hazard will be Low.

Forecast Weather Influences

Overnight showers will be of rain at most levels with some summit snow clearing to give a dry day with the freezing level at around 1000 metres. Storm force South-Westerly winds overnight will gradually ease to become fresh by the end of the day.

Comments

Only limited patchy snow cover remains. Greatest amounts are around coire rims, in gullies and on a few summit slopes. More snow on the inland hills in the area with many, slopes, ridges and summits on the more coastal hills bare of snow.
