Southern Cairngorms

Avalanche Hazard Forecast

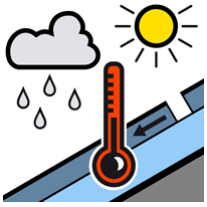

Issued 11/04/2024

FOR PERIOD 18:00HRS Thu 11/04/2024 TO 18:00HRS Fri 12/04/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 12/04/2024

Avalanche Problems

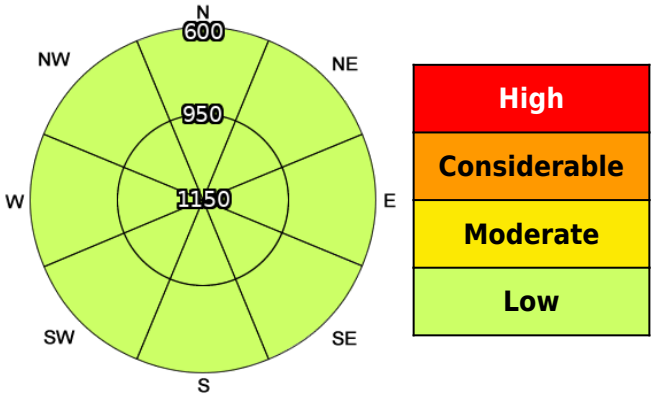

Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

The remaining snow will continue to thaw at all levels but remain generally well bonded. Wet snow instabilities will still be possible around steep terrain with collapsing cornice remnants also a hazard. Greatest amounts will be encountered above 950 metres, on West through North to East facing corries and on the higher mountains of the main Cairngorm plateau area. The avalanche hazard will be Low.

Forecast Weather Influences

The freezing level will remain well above the summits with light rain in the afternoon. Winds will be strong, mainly South-Westerly during the day.

Comments

Windy conditions forecast. Falling rock and snow a hazard in corries.
