

THE AVALANCHE HAZARD WILL BE MODERATE**Avalanche Hazard Forecast for Saturday 07/12/2024****Avalanche Problems****Wind Slab****Forecast Snow Stability & Avalanche Hazard**

Accumulations of unstable windslab will develop throughout the forecast period, progressively becoming more widespread as snow is redistributed in very strong winds. Most affected will be steep wind sheltered terrain, South-East through South to West aspects and generally above 600 metres. Elsewhere, areas of old snow will remain firm and wind exposed terrain will be scoured. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

Heavy snow overnight and through the morning, generally above 600 metres, will turn to wintry showers in the afternoon. Widely 10 to 15 cms. expected over the forecast period. Gale to Severe Gale force winds, South-Easterly initially, backing North overnight. The freezing level will rise from around 500 metres overnight to 700 metres by daybreak.

Comments

Greater snow amounts are expected inland. A calmer day on Sunday as storm Darragh continues eastward. Snow showers will ease overnight Saturday into Sunday, as will the Northerly gales through Sunday afternoon.
