

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Friday 27/12/2024

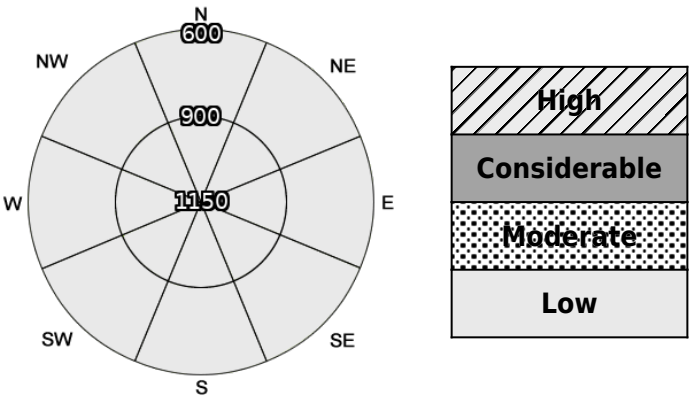

Avalanche Problems

Wet Snow

Forecast Snow Stability & Avalanche Hazard

Little change. The patchy snow cover will continue to thaw but will remain generally well bonded. Greatest amounts will be found in wind sheltered features above 900 metres mostly on North-East to South-East aspects. The majority of the hill is snow free. The avalanche hazard will be Low.

Forecast Weather Influences

Remaining mild with the freezing level above the summits. Light rain overnight, otherwise it's expected to be dry during the day. Winds will be moderate, mainly South-South-West.

Comments

A brief cooler period is expected later Friday into Saturday.
