

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Sat 11/01/2025 TO 18:00HRS Sun 12/01/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

A transition to milder Atlantic weather conditions. No precipitation is forecast. Light to moderate Southerly winds becoming stronger by then end of the day. Freezing at 900m overnight becoming progressively milder from the early hours onwards.

Forecast Snow Stability and Avalanche Hazard

Good stability in most locations below 950m as the snow progressively consolidates. Some residual instability in older windslab on steepest North East through East to South aspects above 950m. Small cornices above some of these locations will weaken later after milder conditions become established. The avalanche hazard will be Low.

Observed Avalanche Hazard - Sat 11/01/2025

Observed Weather Influences

Dry throughout. Very cold overnight but temperatures eased gradually during the day. Light variable winds freshened from midday onwards.

Observed Snow Stability and Avalanche Hazard

No new drifting at the time of reporting. Lingering localised instability high on steep East-South-East to South aspects above 950m. The top of some North East and East facing gullies are also affected. Better stability at lower altitudes in these places and on all other aspects. The avalanche hazard is Moderate.

Mountain Conditions

Observed Mountain Travel Conditions

Snow cover at all levels - some exposed ridges scoured. Good visibility. Winds approx 10mph or less

Comments

Consolidation expected in most snow below 950m. Small cornices will weaken later.
