

Avalanche Hazard Forecast for Monday 20/01/2025

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There is currently insufficient snow for an avalanche hazard and no avalanche reports will be published until conditions change. For further information on mountain conditions, please refer to the SAIS mountain blog.

Forecast Weather Influences

No precipitation forecast. Moderate to fresh West-South-Westerly winds. Freezing level lowering to 1250 metres during the afternoon.

Comments

Snow was firm and icy first thing, softening slightly later.
