

**Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Tue 04/02/2025 TO 18:00HRS Wed 05/02/2025**

Hazard Level	Avalanche Probability
<b>Very High</b>	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
<b>High</b>	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
<b>Considerable</b>	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
<b>Moderate</b>	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
<b>Low</b>	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

**Forecast Weather Influences**

The freezing level will be around 700 metres with the near gale force South-Westerly winds. Overnight snow showers will die out through the day.

**Forecast Snow Stability and Avalanche Hazard**

The existing snowpack will freeze and become hard, icy and stable. Fresh areas of unstable windslab will be deposited in sheltered North to East aspects above 1000 metres. Coire rims and the tops of gullies will be most affected. In general these areas will not be extensive, and should be generally avoidable. The avalanche hazard will be Moderate.

**Observed Avalanche Hazard - Tue 04/02/2025**

**Observed Weather Influences**

After a mild wet morning colder showery conditions were experienced through the afternoon. The freezing level dropped from above the summits to around 900 metres by mid-afternoon.

**Observed Snow Stability and Avalanche Hazard**

The well consolidated snowpack is wet throughout. During the afternoon it started to turn firm and icy at higher levels. Stability was good throughout. There were some fresh deposits at higher levels, but these are not substantial. The avalanche hazard is Low.

**Mountain Conditions**

**Observed Mountain Travel Conditions**

Wet snow throughout. Cloudy on the tops with some occasional bright spells. Winds 20 -30 mph progress difficult at times with stronger gusts.

**Comments**

Some uncertainty over snowfall amount, hazard might be Low if less than expected snowfall occurs.
