

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 13/02/2025

Avalanche Problems

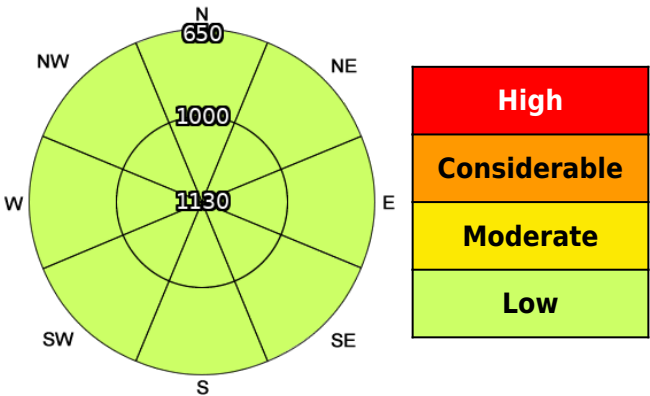

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Little change is expected. Localised instabilities will persist, mainly on steep North to East aspects above 1000 metres. Otherwise stability will be generally good. Small old cornices will remain in places, mainly above North to East aspects. The avalanche hazard will be Low.

Forecast Weather Influences

It will be a dry cold day, with the freezing level around 500 metres. Winds will be strong generally East-South-Easterly.

Comments

Patches of ice in many places.
