

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Thu 13/03/2025 TO 18:00HRS Fri 14/03/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

Light showers in the early part of the night will fall as snow above around 500 metres then clear to give a dry day. Moderate, mainly Northerly winds will decrease in strength through the day. The freezing level will rise to around 800 metres.

Forecast Snow Stability and Avalanche Hazard

Little change is expected. New snow deposits overnight are not expected to be significant. There will be a thin covering of stable snow on most aspects above 700 metres. A gradual thaw will take place during the day particularly on slopes exposed to the sun. The avalanche hazard will be Low.

Observed Avalanche Hazard - Thu 13/03/2025

Observed Weather Influences

A mainly dry day with occasional light showers which were snow above around 500 metres. Moderate North-Westerly winds. The freezing level was around 700 metres at midday rising slightly in the afternoon.

Observed Snow Stability and Avalanche Hazard

There is a thin cover of stable snow on most aspects, mainly above 700 metres. The avalanche hazard is Low.

Mountain Conditions

Observed Mountain Travel Conditions

Thin snow cover mainly above 700 metres. Cloudy on the tops with some bright spells. Winds approx 10 - 20 mph.

Comments

Remaining dry for the next few days and becoming warmer through the weekend.
