

Avalanche Hazard Forecast for Wednesday 02/04/2025

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There is currently insufficient snow for an avalanche hazard and no avalanche reports will be published until conditions change. For further information please refer to the SAIS mountain blog.

Forecast Weather Influences

It will remain dry and mild, with the freezing level well above all summits. Winds will be generally Southerly, strong overnight easing through the day.

Comments

Dry settled conditions are expected for next couple of days.
