Forecast Weather Influences

Forecast Snow Stability and Avalanche Hazard

Daily avalanche reports have ended for this season. Please refer to SAIS homepage <https://www.sais.gov.uk> for current general snowpack and mountain information. The SAIS team would like to thank you for all your support over the last winter and wish you a good summer. See you next winter!

Observed Avalanche Hazard - Sun 06/04/2025

Observed Weather Influences

A fine sunny day. The freezing level is above the summits.

Observed Snow Stability and Avalanche Hazard

The patchy spring snow is well bonded and stable. Greatest amounts remain in gullies and around coire rims on North to East aspects above 1100 metres. Very little if any snow elsewhere. The avalanche hazard is Low.

Mountain Conditions

Observed Mountain Travel Conditions

Sparse snow cover mostly bare ground. Winds approx 10 - 20 mph. Warm sunny conditions.
