

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Mon 24/11/2025 TO 18:00HRS Tue 25/11/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

Freezing level falling from 1000m during the evening then to 800m overnight, then at 5-600m during the day. Snow showers dying out overnight clearing by morning, a mostly dry day is expected. Winds generally moderate to light North-Westerly overnight becoming light and variable during the day.

Forecast Snow Stability and Avalanche Hazard

Localised windslab will be present above 900 metres on South-East to South-Westerly aspects, Coire rims and gully tops most affected. Elsewhere the moist snowpack will refreeze and will be firm and stable throughout. The avalanche hazard will be Moderate

Observed Avalanche Hazard - Mon 24/11/2025

Observed Weather Influences

A day of very poor visibility above 800m. Precipitation falling as rain to summit levels at first then turning to snow as the freezing level dropped to 1000m or so, then lower later. Winds light to moderate Northerly becoming very strong in the afternoon.

Observed Snow Stability and Avalanche Hazard

The snowpack is generally moist and stable at all elevations. New windslab is building on mostly Southerly to Westerly aspects above 900m, especially in wind sheltered localised places above 900m with coire rims and gully tops most affected. The avalanche hazard is Moderate

Mountain Conditions

Observed Mountain Travel Conditions	Most snowpack. Breakable crust at all levels. Whiteout conditions presenting challenging navigation. Winds 20 -30 mph.
Comments	A clear and cold day in prospect for Tuesday, poor viz and mild Wednesday.
