

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Sat 29/11/2025 TO 18:00HRS Sun 30/11/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

Light winds are expected, mainly from a Southerly direction. No precipitation is forecast. The freezing level is expected to rise to around 400m.

Forecast Snow Stability and Avalanche Hazard

Little change is expected. Shallow snow cover will remain on all aspects above 900m which is icy in places. The greatest accumulations will exist on North to East aspects above 1000m. Softer snow underlies a hard and icy crust, the snowpack is generally stable. The avalanche hazard will be Low.

Observed Avalanche Hazard - Sat 29/11/2025

Observed Weather Influences

Moderate North-Easterly winds. No precipitation. The freezing level rose to around 500m.

Observed Snow Stability and Avalanche Hazard

There is a superficial covering of snow on all aspects above 900m. Greatest accumulations are present on steep North and Easterly aspects mainly above 1000m. The snowpack is generally stable. The avalanche hazard is Low.

Mountain Conditions

Observed Mountain Travel Conditions

Breakable crust at all levels, very tiring conditions. Localised, whiteout conditions with poor visibility. Winds approx 10 - 20 mph serious windchill.

Comments

Breakable Crust! A variety of difficult underfoot conditions. Breakable crust and icy conditions made for slow progress today. Only on the highest tops was the snow pack firm enough to hold a persons weight. Other wise relatively calm, cold and dry with good visibility on most hills.
