

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Sun 30/11/2025 TO 18:00HRS Mon 01/12/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

Overnight, Storm Force South-South-East winds, easing to moderate strength and veering to a South-South-Westerly during the day. Overnight precipitation is expected, falling as snow above 900 meters. The freezing level will rise to summit level during the day.

Forecast Snow Stability and Avalanche Hazard

Fresh deposits of poorly bonded windslab will accumulate overnight on North-West to North-East aspects above 1100 meters. These instabilities are expected to be localised affecting wind sheltered locations such as corrie headwalls and the tops of gullies. On other aspects and at lower elevations the snowpack will be generally stable. The avalanche hazard will be Moderate.

Observed Avalanche Hazard - Sun 30/11/2025

Observed Weather Influences

Light Easterly winds. No precipitation. The freezing level rose to around 500 meters.

Observed Snow Stability and Avalanche Hazard

There is a superficial covering of snow on all aspects above 900m. Greatest accumulations are present on steep North and Easterly aspects mainly above 1000m. The snowpack is generally stable. The avalanche hazard is Low.

Mountain Conditions

Observed Mountain Travel Conditions	Very hard snow ice above 900m on all aspects. Good visibility. Winds approx 10mph or less.
-------------------------------------	--

Comments	A stunning day, with great views. Snow cover on all aspects above 900m, very hard and icy. Slip hazard with very consequential runouts.
