

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 08/12/2025

Avalanche Problems

Cornices

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will continue to slowly thaw and consolidate. Fresh deposits of snow are expected to be wet, and generally stable. However, some unstable sections of cornice will remain on North to East aspects above 1100 metres. The avalanche hazard will be Low.

Forecast Weather Influences

A cloudy day is expected with frequent showers which will fall as wet snow on the highest tops. Winds will be from the South-West. The freezing level will be around 1200 metres.

Comments

Freezing level will remain around or above the tops for the next few days.
