

Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Sun 07/12/2025 TO 18:00HRS Mon 08/12/2025

Hazard Level	Avalanche Probability
Very High	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
High	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
Considerable	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
Moderate	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
Low	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

Forecast Weather Influences

A cloudy day is expected with frequent showers which will fall as wet snow on the highest tops. Winds will be from the South-West. The freezing level will be around 1200 metres.

Forecast Snow Stability and Avalanche Hazard

The existing snowpack will continue to slowly thaw and consolidate. Fresh deposits of snow are expected to be wet, and generally stable. However, some unstable sections of cornice will remain on North to East aspects above 1100 metres. The avalanche hazard will be Low.

Observed Avalanche Hazard - Sun 07/12/2025

Observed Weather Influences

It was a dry but cloudy morning. During the afternoon there was some rain which fell as wet snow on the highest tops. The freezing level was around 1300 metres. Winds were generally quite light.

Observed Snow Stability and Avalanche Hazard

The snowpack is slowly thawing in the mild conditions. Stability is generally good. However, there are a few sections of unstable cornice remaining at the tops of slopes and gullies above 1100 metres. The avalanche hazard is Low.

Mountain Conditions

Observed Mountain Travel Conditions

Main snowpack remains above 950 metres. Cloudy on the tops throughout the day. Winds relatively light.

Comments

Freezing level will remain around or above the tops for the next few days.
