

**Avalanche Hazard Forecast**

FOR PERIOD 18:00HRS Sun 14/12/2025 TO 18:00HRS Mon 15/12/2025

**Avalanche Hazard Forecast for Monday 15/12/2025****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

Any new snow is not expected to be significant mainly a very light dusting over the highest summits. There is currently insufficient snow for an avalanche hazard and no avalanche reports will be published until conditions change. For further information please refer to the SAIS mountain blog.

**Forecast Weather Influences**

Overnight, the freezing level will lower to around 1000 metres where it is likely to remain through the forecast period. Rain through Sunday evening turning to light snow showers for a short time mainly above 950 metres. The Southerly winds will ease becoming moderate through the day.

**Comments**

A dry, clear day is forecast.
