

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 15/12/2025

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining snow patches will be well bonded and stable. Small, easily avoidable patches will be found above 800 metres. Larger areas will be encountered around corrie rims and in gully lines above 950 metres on North to East aspects. The avalanche hazard will be Low.

Forecast Weather Influences

Light overnight rain will ease to give a dry day. The freezing level will lower to around 950 metres in the early hours and settle around 1200 metres during the day. Winds will ease to become moderate Southerlies.

Comments

Looking slightly cooler for Monday and Tuesday.
