

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Sunday 04/01/2026

Avalanche Problems

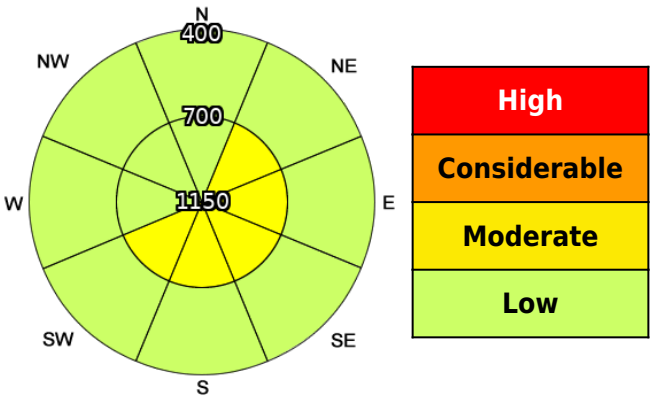

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Unstable windslab will be present in wind sheltered locations on North-East through South-East to South-West aspects above 700 metres with localised drifts present below this altitude. Fragile cornices will exist above these slopes. Wind exposed slopes will be scoured and stable. The avalanche hazard will be Moderate.

Forecast Weather Influences

Light snow showers expected throughout the period. Gale force North-North-West, easing to strong North-West winds. Freezing at all levels.

Comments

If you are heading into the mountains North of the River Dee please read the North Cairngorms report as there has been more snowfall there.
