

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Thu 15/01/2026 TO 18:00HRS Fri 16/01/2026

THE AVALANCHE HAZARD WILL BE MODERATE**Avalanche Hazard Forecast for Friday 16/01/2026****Avalanche Problems**

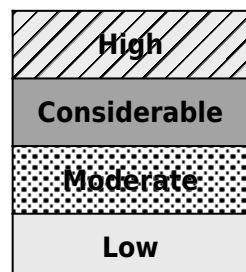

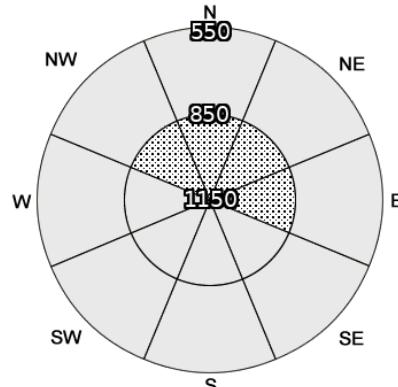

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Deposits of unstable windslab will be present in steep wind sheltered locations on mainly North-West through North to East aspects above 850 metres. Greatest accumulations will be around coire rims, gully tops, ridge flanks and sheltered hollows. Cornices will be fragile on these aspects also. Elsewhere the snowpack will continue to consolidate and be generally stable. The avalanche hazard will be Moderate.

**Forecast Weather Influences**

Dry overnight with only occasional showers through the day, mainly in the afternoon. The freezing level will be between 700 and 800 metres. Any showers will fall as snow above 700 metres. Moderate winds from South-Easterly directions will strengthen slightly during the day.
