

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 04/03/2026

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Surface layers of the snow will soften but the snowpack will remain generally well bonded and stable. Greatest cover will be mainly on plateau areas and South-West through North-West to North aspects above 850 metres. The avalanche hazard will be Low

Forecast Weather Influences

The freezing level will rise above the summits with light rain at all levels during the day. Strong Southerly winds throughout.

Comments

Despite a rising freezing level there was still a high wind chill on the hills. Very icy underfoot.
