

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 09/03/2026

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. Above about 1100 metres the snowpack will be firm and icy, below this level it will be softer. In both cases stability will be good. The avalanche hazard will be Low.

Forecast Weather Influences

Although a light rain or sleet shower can't be ruled out it will be generally dry. The freezing level will be around the summits creeping downward during the day.

Comments

Snowpack remaining firm, particularly on higher summits.
