Issued 03/01/2010

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 03/01/2010 TO 18:00HRS Mon 04/01/2010

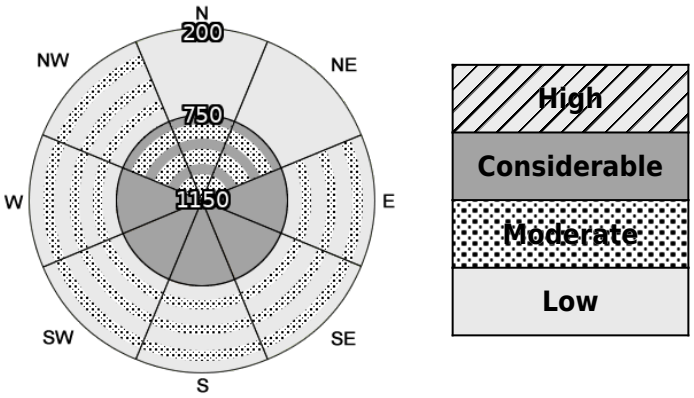

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 04/01/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Areas of poorly bonded windslab will exist in sheltered areas such as summit gullies and on steep East through South to North-Westerly aspects aspects mainly above 750 metres where avalanches are likely. The avalanche hazard will be Considerable.

Forecast Weather Influences

It will remain cold with fresh North-Westerly winds and snow showers becoming more persistent through the course of the day.

Comments

Areas of windslab many of which are of a localised nature will require great caution and careful route planning. Ice is forming on a good number of routes now.
