

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 09/01/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There will be little change within the existing cold snowpack. Instabilities will affect many areas above 900 metres especially around corrie rimes and in steep terrain. East through South to Westerly aspects will be particularly affected. The avalanche hazard will be Considerable.

Forecast Weather Influences

Due to a ridge of high pressure it will remain very cold and dry with light East winds.

Comments

Careful route choice needed especially in areas of steep terrain. Most people travelling on snowshoes or skis today.
