

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Monday 11/01/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Persistent weak layers and instabilities are still observed in the cold snowpack. On South-East through South to North-West aspects above 600 Metres particularly on steep, convex unsupported terrain avalanches are likely. The avalanche hazard will be Considerable.

Forecast Weather Influences

Very light snow is forecast for Monday with continuing cold temperatures and moderate to strong Easterly winds prevailing.

Comments

Deep foot trench for approach to Lochnagar. Very narrow road access (see blog photo)
