Glencoe

Issued 22/01/2010

Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Fri 22/01/2010 TO 18:00HRS Sat 23/01/2010

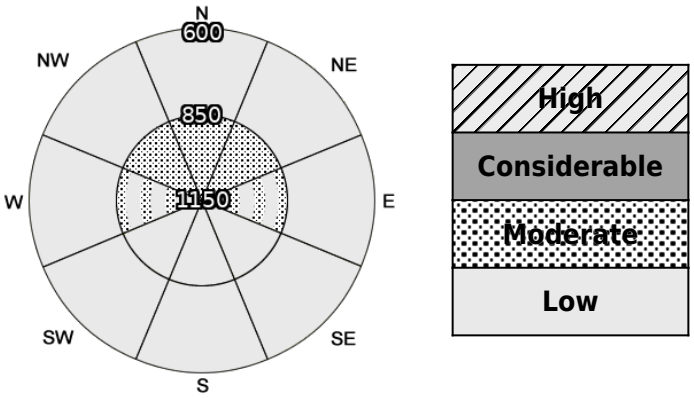

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 23/01/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to consolidate as the freezing level drops and it will remain generally well bonded on all aspects. Above 900 metres on North-West through to North-East aspects some localised instabilities well be present in steep sheltered locations.The avalanche hazard will be Moderate

Forecast Weather Influences

It should remain dry with light North-Easterly winds and the freezing level dropping to around 800 metres.

Comments

A ridge of high pressure should bring some dry more settled conditions.
