Avalanche Hazard Forecast

Issued 24/01/2010

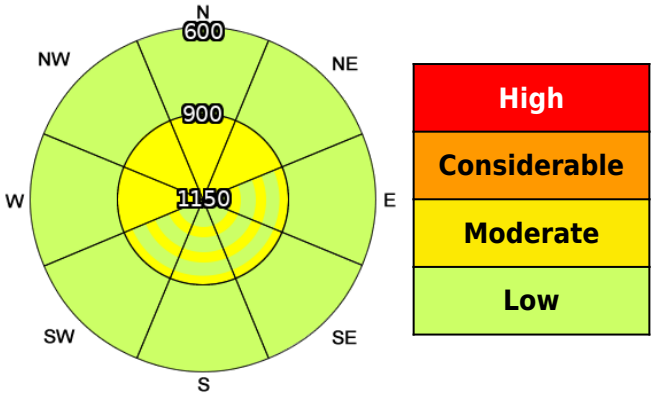

FOR PERIOD 18:00HRS Sun 24/01/2010 TO 18:00HRS Mon 25/01/2010

Avalanche Hazard Forecast for Monday 25/01/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The cold conditions will continue to help further consolidation within the snowpack. It will remain generally well bonded on most aspects. There will be some localised areas on moderately bonded windslab mainly on the steeper slopes above 900 metres with a West through North to North-East aspect. The avalanche hazard is Moderate.

Forecast Weather Influences

Dry, cold weather conditions with Easterly winds overnight becoming Southerly winds during the day. Freezing level around 350 metres.

Comments

A ridge of high pressure building.
