

THE AVALANCHE HAZARD WILL BE CONSIDERABLE**Avalanche Hazard Forecast for Monday 01/02/2010****Avalanche Problems****Forecast Snow Stability & Avalanche Hazard**

There is overall strengthening of the deeper snowpack, however the unstable surface wind slab is likely to avalanche on steep, convex terrain. The hazard will be mainly on scarp slopes and gully exits from North-East through South to South-West aspects above 700 metres. The avalanche hazard will be Considerable.

**Forecast Weather Influences**

There will be very light snow showers with a slight rise in temperature but still remaining below freezing above 500 metres. Winds will moderate and change from North-West to South-West.

Comments

Carn an Tuirc busy today; with kites, on skis or crampons and the Aberdeen MRT all enjoying a fine winter day.
