

## THE AVALANCHE HAZARD WILL BE CONSIDERABLE

### Avalanche Hazard Forecast for Monday 01/02/2010

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Localised accumulations of poorly-stabilised windslab will form on steep North through East to South aspects above 800m. More extensive windslab build up expected on East-facing slopes and gullies. Good stability expected in all other locations. The avalanche hazard will be Considerable.

#### Forecast Weather Influences

There will be light snow showers. Winds will be moderate North-West and back South-West during the day. (Low confidence in snow amounts. See Comments).

#### Comments

Low confidence in forecasted snow amounts. In the event of heavier snowfall instability will be more widespread.
