

**Avalanche Hazard Forecast - FOR PERIOD 18:00HRS Wed 10/02/2010 TO 18:00HRS Thu 11/02/2010**

Hazard Level	Avalanche Probability
<b>Very High</b>	Natural and human triggered avalanches will occur. Numerous very large, often extremely large natural avalanches can be expected.
<b>High</b>	Natural and human triggered avalanches will occur. In some cases, numerous large, often very large sized natural avalanches can be expected.
<b>Considerable</b>	Natural and human triggered avalanches possible, in some cases large, in isolated cases very large sized natural avalanches are possible.
<b>Moderate</b>	Very large sized natural avalanches are unlikely. Human triggering possible in indicated steep places.
<b>Low</b>	Only small and medium sized natural avalanches are possible. Human triggering possible in steep, extreme terrain.

**Forecast Weather Influences**

Cold and dry conditions will continue

**Forecast Snow Stability and Avalanche Hazard**

Localised areas of hard, moderately well bonded windslab will be present on many steep slopes above 900m. The avalanche hazard will be Moderate

**Observed Avalanche Hazard - Wed 10/02/2010**

**Observed Weather Influences**

Cold and settled conditions

**Observed Snow Stability and Avalanche Hazard**

Localised areas of hard windslab are present on many steep slopes. In places this snow is moderately bonded to the underlying snowpack. The avalanche hazard is Moderate

**Mountain Conditions**

**Observed Mountain Travel Conditions**

Reasonable cover above 750m.

**Comments**

Reasonable climbing conditions on the upper crags.
