Glencoe

Avalanche Hazard Forecast

Issued 10/02/2010

FOR PERIOD 18:00HRS Wed 10/02/2010 TO 18:00HRS Thu 11/02/2010

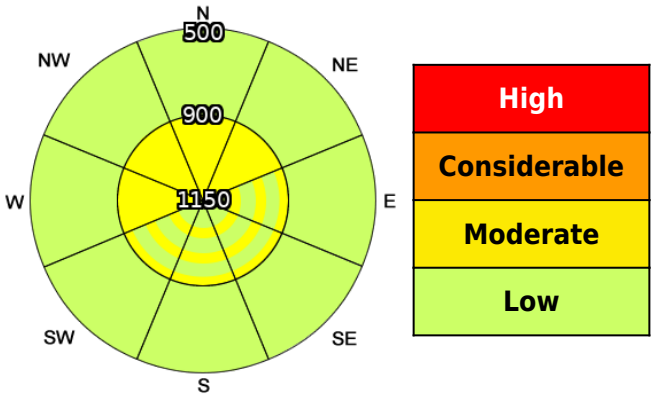

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 11/02/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Conditions will continue to consolidate much of the snowpack. Amounts of new snow by morning are not expected to be of any significant quantity. Areas of moderately bonded windslab will remain mainly above 900 metres in the most sheltered of gullies and also on steep West through North to North-Easterly aspects. Steep scarp slopes,corniced areas and gully exits will be most affected. The avalanche hazard will be Moderate.

Forecast Weather Influences

It will remain cool and dry over night with light patchy snow through the morning. Winds will be moderate from a North-West to a Northerly direction.

Comments

Climbing conditions are improving on many of the higher buttresses. Excellent skiing on a great snow cover at Glencoe Ski Centre.
