Glencoe

Avalanche Hazard Forecast

Issued 11/02/2010

FOR PERIOD 18:00HRS Thu 11/02/2010 TO 18:00HRS Fri 12/02/2010

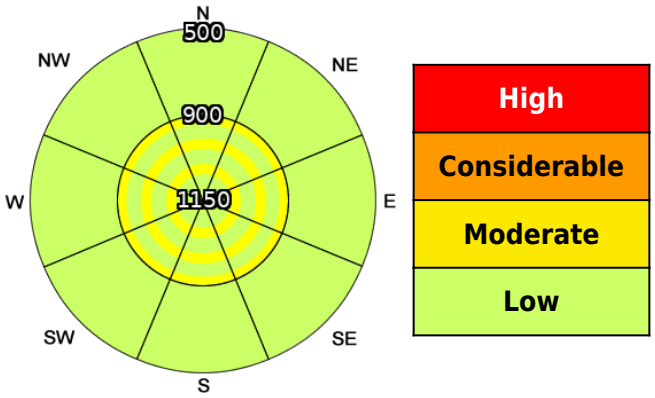

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 12/02/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

In general snowpack stability will be good in most areas but localised areas of moderately bonded soft snow will remain mainly above 900 metres on the steepest of slopes. Gully exits, steep scarp slopes and corniced areas will be most affected. The avalanche hazard will be Moderate.

Forecast Weather Influences

Dry settled and cool conditions will continue.

Comments

Climbing conditions continue to improve on many of the higher buttresses. Excellent skiing on a great snow cover at Glencoe ski Centre.
