Glencoe

Avalanche Hazard Forecast

Issued 19/02/2010

FOR PERIOD 18:00HRS Fri 19/02/2010 TO 18:00HRS Sat 20/02/2010

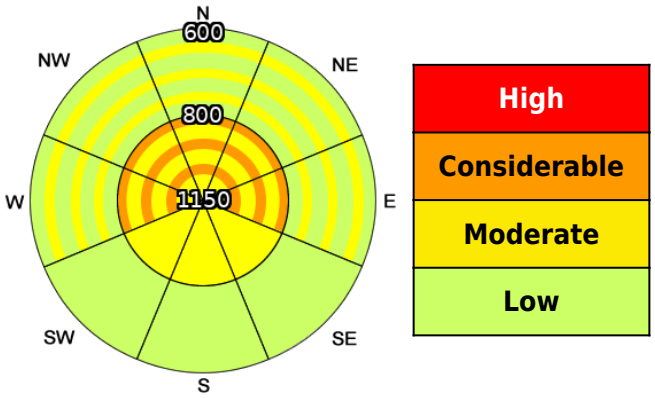

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 20/02/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Again the very cold conditions will maintain a 'status quo' bringing little change to the snowpack. The expected isolated snow flurries are not expected to be significant. But localised deposits of poorly bonded snow will persist especially on the steeper slopes on all aspects above 900 metres. The avalanche hazard will be Considerable.

Forecast Weather Influences

It will remain cold, freezing at all levels. Again generally dry with the odd occasional snow flurries overnight and during the day. Winds will light South-Westerly through the night backing to the South in the day.

Comments

Good climbing and great ski conditions.
