Issued 19/02/2010

FOR PERIOD 18:00HRS Fri 19/02/2010 TO 18:00HRS Sat 20/02/2010

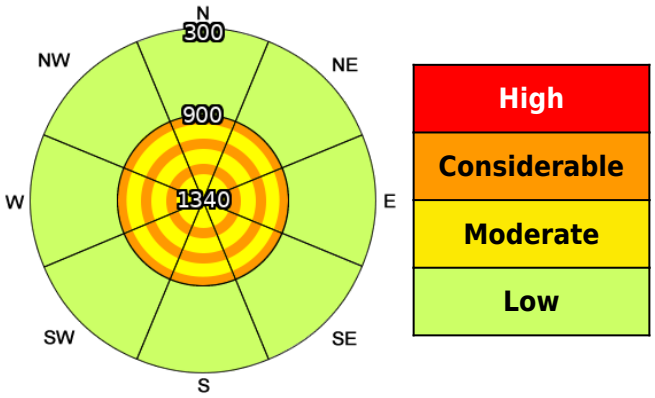

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 20/02/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. Deep accumulations of soft unconsolidated snow will exist at most levels. There will be further slight accumulations through the day. Local instabilities will exist on steep slopes and gullies on all aspects above 900 metres. Below this level stability will generally be good. The avalanche hazard will be Considerable

Forecast Weather Influences

Conditions will remain cold with the freezing level barely rising above sea level. There will be a few snow showers and light Southerly winds.

Comments

Blue skies, light winds, and deep soft snow. A great winter's day in Lochaber on Friday, hopefully more of the same during the weekend.
