

## THE AVALANCHE HAZARD WILL BE CONSIDERABLE

### Avalanche Hazard Forecast for Sunday 21/02/2010

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

Localised instabilities will continue to affect many aspects above 950 metres especially in areas of steep terrain, corrie rims, convexities and gully exits. Below this level the snowpack will remain generally stable in most areas. The avalanche hazard will be Considerable.

#### Forecast Weather Influences

It will be dry with light Southerly winds and freezing at all levels.

#### Comments

Some quite large cornices overhanging parts of the N Corries. A stunning day in the Cairngorms today.
