Glencoe

Avalanche Hazard Forecast

Issued 06/03/2010

FOR PERIOD 18:00HRS Sat 06/03/2010 TO 18:00HRS Sun 07/03/2010

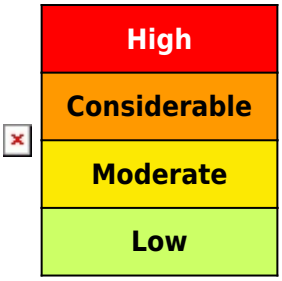

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Sunday 07/03/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The general snowpack stability will continue to improve in many areas. Areas of moderate to weakly bonded windslab will remain mainly in deeper sheltered gullies, hollows and around corniced areas above 800 metres. Weaknesses will also develop where deep older windslab exists on Southerly and Westerly aspects and is affected by rising daytime temperatures. The avalanche hazard will be Considerable.

Forecast Weather Influences

Dry and settled conditions will continue with cooler conditions overnight and milder through the day.

Comments

Feels like Spring has arrived. Rising daytime temperatures and strong solar radiation may cause cornice collapse.
